# Achieve Legislative Compliance

*Simpler Recycling*

*2025*

**with Soho Commercial**

## *Simpler Recycling: A Legislative Change*

### **What is the legislation?**

*Simpler Recycling* - introduced by the UK Government on 21 October 2023 and set to take effect in March 2025 - is a new regulation aimed at overhauling waste collection and recycling practices across England. It seeks to eliminate confusion over what materials can be recycled, creating uniform recycling standards for households, businesses, and schools. The legislation is designed to reduce landfill use, improve recycling efficiency, and combat illegal waste activities, promoting a more sustainable and environmentally conscious approach to waste management.

### **What does this mean for me?**

The new *Simpler Recycling* legislation requires businesses with 10 or more employees to separate dry recyclables into designated containers and ensure that food waste is collected separately. This mandate takes effect in March 2025. Smaller businesses, with fewer than 10 employees, have until March 2027 to comply.

Local authorities must also adapt by March 2026, ensuring consistent recycling services for households, including mandatory weekly food waste collections.

## *Simpler Recycling* Timeline for Businesses, Hospitals & Schools

21 October 2023

UK Government introduces *Simpler Recycling* legislation with it set to take effect from March 2025.

Local authorities will be required to provide households with:

**By 31 March 2026**  
Mandatory collections of dry mixed recycling and separate weekly food waste collections.

**By 31 March 2027**  
Inclusion of plastic film packaging and bags with plastic waste stream.

# Mixed Recycling

Mixed recycling allows for the disposal of a variety of recyclable materials, such as paper, plastic, glass, and metal all in one bin. It reduces the amount of waste sent to landfill and helps support a circular economy.

At Soho Commercial, we stock a number of solutions designed to help you comply with new *Simpler Recycling* legislation and support the next step in your sustainability journey.

# Paper Recycling

Paper recycling plays a crucial role in reducing waste, conserving natural resources, and minimising environmental impact. By recycling paper products like newspapers, magazines, cardboard, and office paper, we can help reduce the demand for virgin materials, saving millions of trees and conserving water and energy.

Soho Commercial is dedicated to protecting our natural resources and offer a range of products to assist you make positive steps towards preserving the natural world.

# Glass Recycling

Glass recycling is key to sustainability, turning waste into reusable material while conserving resources. Made from sand, soda ash, and limestone, glass is 100% recyclable without losing quality or purity. Diverting it from landfills supports a circular economy and protects resources.

Let Soho Commercial help you adopt sustainable practices and achieve legislative compliance with our glass recycling solutions.

# Plastic Recycling

Plastics, which are widely used in packaging, consumer goods, and industrial applications, can take hundreds of years to decompose in landfills. By recycling plastic, we reduce the demand for virgin materials, save energy, and decrease greenhouse gas emissions.

Take the strain out of waste management and get your plastic recycling solutions from Soho Commercial.

# Metal Recycling

As one of the most sustainable materials, metals can be recycled repeatedly without losing their inherent properties, making them ideal for a circular economy. As well as reducing energy consumption, metal recycling plays a crucial role in conserving natural resources while protecting the natural world from unnecessary damage.

Reduce the amount of waste you send to landfill with a metal recycling solution from Soho Commercial.

# Food Recycling

Food waste recycling is a vital step toward reducing the environmental impact of discarded food while promoting sustainability. By diverting organic waste away from landfill it can be reused to develop valuable resources, such as compost, biogas, or bioenergy.

Take steps towards *Simpler Recycling* compliance and a greener world with a Soho Commercial food recycling solution.

# General Waste

General waste includes everyday items that cannot be recycled, composted, or reused. Proper management of general waste is crucial to minimise its environmental impact, as most of it ends up in landfills or is incinerated, contributing to pollution and greenhouse gas emissions.

Soho Commercial can help you implement efficient waste handling solutions to reduce the amount of non-recyclable waste that ends up in landfill.

# Recycling Hubs

Recycling and proper waste management are essential practices that benefit both the environment and society. As global consumption continues to rise, managing waste effectively has become increasingly important to reduce the strain on natural resources, minimise pollution, and combat climate change. By embracing recycling and proper waste management, individuals and industries can help mitigate environmental damage, conserve resources for future generations, and foster a cleaner, more sustainable world.

Soho Commercial can help you realise *Simpler Recycling* compliance with a variety of multi-stream recycling hubs.
